

# Design Team Report to COGA

COGA Meeting April 13-15 2021

## Current work

- The committee continues to meet weekly except for the week of COGA meetings.
- Since the March COGA call we have worked on the proposed docket, incorporating feedback related to the timing of the moderator's election and pacing of the first plenaries which will be conducted as a hybrid of in-person and on-line participation.
- We have spent time talking about strategies for building community and conducting trainings on-line and hope to merge our conversations with the Process & Discernment Team in the near future.
- We held a conversation with approximately 40 mid council leaders to receive their feedback on the draft docket, as well as talk about the shared OGA and MCL responsibility for commissioner/advisory delegate training and orientation. We also talked about new ideas for in-person support of commissioners/ADs during the Louisville days of the assembly and on-line days in small groups. During the opening of the conversation, we had a helpful Q&A that gave us a chance to answer some general questions and gather some to bring back to the Design Team. We will invite the same participants to a second conversation in the next few weeks since we didn't get to all the topics we intended to cover in the time allotted.

## COGA discussion & action items

- Take action on proposed GA 225 Docket
